

# Pool Vac XL™

AUTOMATIC SUCTION CLEANER

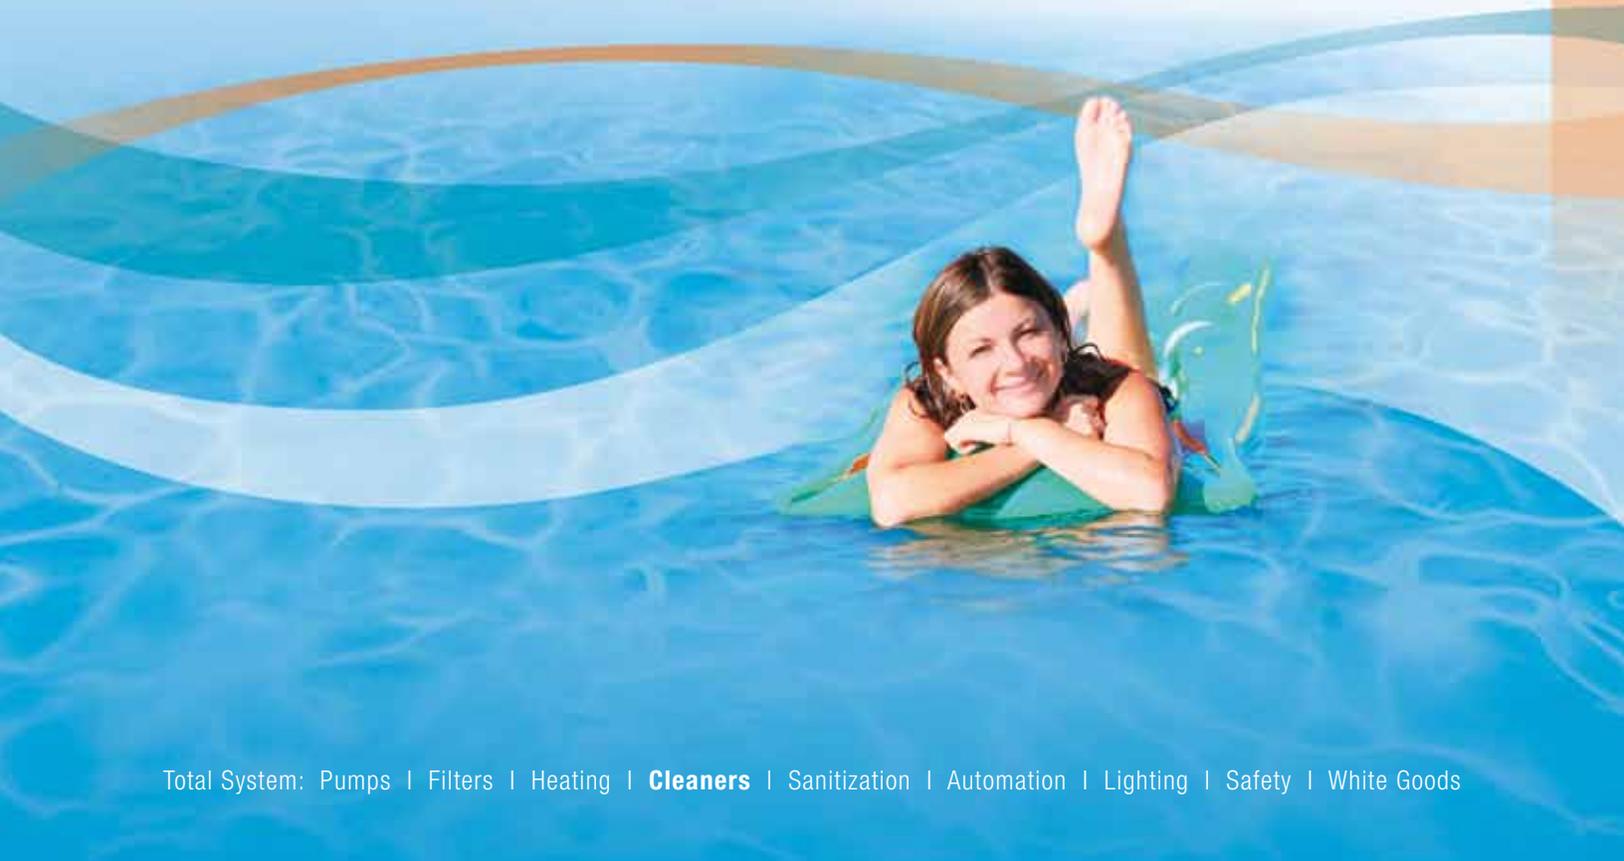

## Automatic Programmed Steering

Features of the Hayward® Pool Vac XL automatic in-ground pool cleaner:

- Exclusive AquaPilot® advanced programmed steering ensures efficient and complete pool coverage for a cleaner pool.
- The Enhanced Vacuum Wings' downdraft design vacuums up sand, twigs, leaves and pollen.
- Unique turbine system provides constant balanced water flow for silent operation and gentle movement across pool surfaces.
- Installs in less than 10 minutes without tools.
- 2 year warranty

### Applications

In-ground residential pools (vinyl, gunite/tile and fiberglass models available)

### High-Flow Hose

- Reduces hydraulic friction for efficient operation
- No bags to empty or replace
- Powered by existing filtration system

### Hydro-Dynamic Head Design

- Designed for style, engineered for performance
- Turbine-drive system for smooth, silent operation

### Vacuum Wings

- Downdraft design captures pollen, sand, twigs, leaves and pebbles

### Adaptive Steering Assembly

- Guides the hose as programmed steering maneuvers the cleaner around the pool, eliminating hose tangles

### Advanced Pod Propulsion

- Eliminates the need for wheels and belts
- Consistent performance and long life

## Intelligent cleaning every time with AquaPilot® technology.

Exclusive AquaPilot technology makes the Pool Vac XL™ faster and more efficient than any random style pool cleaner. Pool Vac XL moves in a predetermined series of right and left turns to provide more thorough coverage of your pool's surfaces. The Pool Vac XL scoops up all types of debris and deposits it directly into your existing filtration system. No need for additional equipment or expense. For the ultimate in easy, trouble-free operation, leave your pool cleaning to the most sophisticated suction pool cleaner available, Hayward's Pool Vac XL.

Your pool is made more enjoyable with the Pool Vac XL.

The Pool Vac XL from Hayward gives you easy, trouble-free operation. And because it's powered by your existing filtration system, you don't have the expense of an energy-consuming booster pump. You won't waste time emptying or replacing debris bags. Getting that sparkling clean pool is easy and effortless with the Pool Vac XL. When you install your new Pool Vac XL as part of the Totally Hayward® System, you get the assurance of knowing you have a complete system, designed to work together for the best automatic operation and the cleanest pool possible.

### ACCESSORIES

**MODEL 2025ADC**  
Pool Vac XL model for concrete pools.

**MODEL 2025ADV**  
Pool Vac XL model for vinyl-liner pools.

The optional Leaf Canister interconnects in-line, trapping leaves and debris before reaching your pool's filter system. Its see-through design lets you know when to empty.

The optional Skimmer Vacuum Plate automatically alternates between vacuuming the pool and skimming the pool's surface with each cycle of the filtration system's time clock.

For pools with a dedicated suction line, Hayward recommends the Vac Lock™. The Vac Lock is a safety mechanism designed with a spring action cover to hold the hose in place and to close the suction fitting automatically when not in use.
