

applications:

LVP's Holland 60mm Pavers can be used on driveways, parking areas, walkways, pools and patios. These pavers are intended for vehicular traffic when installed over a properly prepared subsurface.

features:

The Holland upper surface profile is a flat top with mitered edges. These pavers offer a contemporary look. They can be installed in a staggered or herringbone pattern, also a good choice for contrasting boarder. 60mm pavers can be used with Veneer Coping or 60mm Bullnose Coping.

colors available:

dimensions:

4 1/8 x 8 1/4 inches, 60mm thick

60 mm
2.36 inches

standards and composition:

Las Vegas Paver manufactures its concrete pavers with the highest integrity. Pavers have a compressive strength of 8,000 PSI or greater, with a maximum water absorption of 5%. They meet ASTM C-936 standards for concrete pavers.
