SAVE MORE

Advanced Technology to Save on Energy Bills

Heat Pumps are a great affordable option to heat and cool your pool.

Rheem takes heat pump technology further, to save you more. We've completely re-engineered key elements of the heat pump to maximize efficiency and drive down energy bills.

What's the cost to Generate 1million BTU of heat?

| Category	Cost
Propane Gas	$33.32
Electric Resistance	$26.38
Fuel Oil #2	$25.18
Natural Gas	$16.46
Rheem Heat Pump	$4.40

Chart based on $1.35/Therm natural gas, $2.50/gallon propane gas, $2.75/gallon heating oil, 9 cents/kwh

Get More Heat

Our heat exchanger has been designed to produce more heat. That means you'll stop wasting time waiting for the pool to get warm and save more on your energy bills.

Purpose-Built Fan

Instead of using a conventional fan part, we designed a fan that optimizes airflow for more hot air than any other heat pump.

Smart Energy Use

Every Rheem Heat Pump can detect when it needs to take over for your solar energy system or turn on a gas system for extra heat. It automatically optimizes your cost savings.

Lots of Options for Every Pool

For every pool owner, anywhere you're located, Rheem has the model that will help you get the most from your pool, with heat/cool and active defrost options.

RELAX MORE

No-Hassle Ownership

We've packed Rheem Heat Pumps with features to make ownership hassle free, letting you enjoy your pool anytime.

2 YEARS LABOR / 7 YEARS PARTS · WARRANTY ·

· SAME DAY SERVICE ·

World Class Service

Only Rheem offers same-day service to most of Florida and next-day service to most other areas.

Thanks to our 2-year labor warranty*, 7-year parts warranty and our unbelievable 10-year titanium tube warranty, you're covered. Relax more knowing that Rheem stands behind every product.

MENU/SET

Easy to Use Digital Controls

Our Heat Pumps are equipped with easy to use digital controls.

Whisper Quiet

This means more air flow over the coil which translates to greater efficiency, all while being whisper quiet!

Mini Automation

Automation features you want are built right into your heat pump. Mini Automation allows you to control your 3-way valves, set timing or adjust energy consumption priorities.

Easy Installation

No special hookups required making install easy and simple.
